

## Alliance of Universities in Europe

European Universities Linking Society and Technology

### Objectives

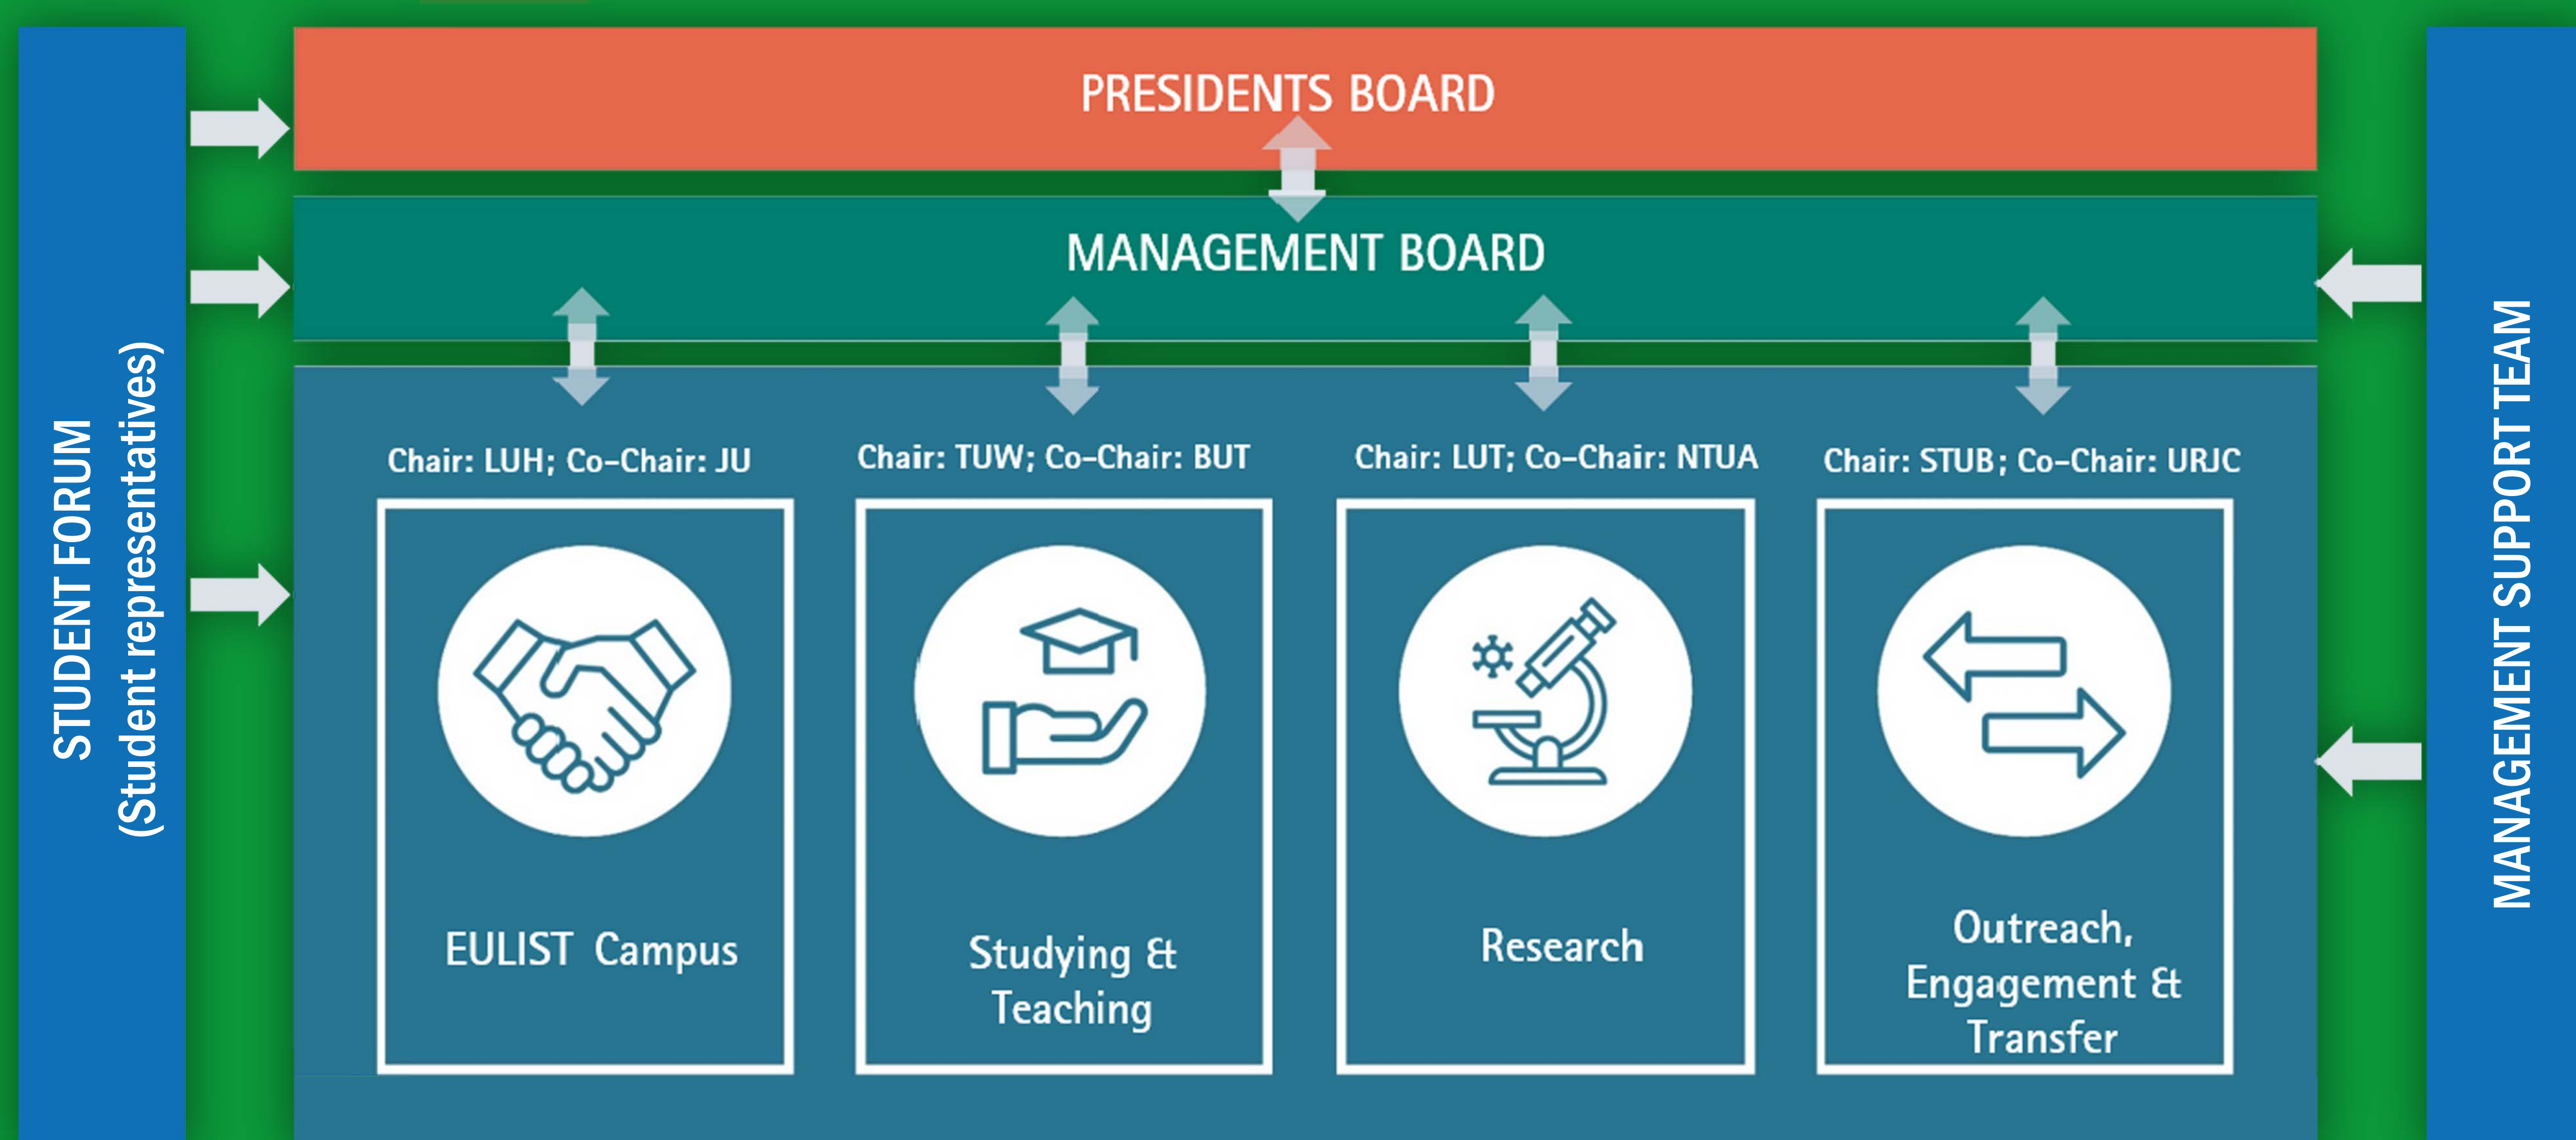

The aim of EULiST Alliance is:

- to **build a long-term strategic partnership** to promote networking and exchange between society and technological development in education, research and knowledge transfer.
- to **develop new sustainable solutions** to major social challenges that we face today and in the future.
- to **offer complementary educational opportunities and mobility** for students, researchers, and staff (e.g., through a single borderless campus)

EULiST serves as an intermediary and generator of knowledge and innovation, empowering responsible change agents to solve the challenges humanity is facing including climate change and green transition. To this end, EULiST strives to generate a unique and creative academic ecosystem inspired by the reciprocities between society and technology.

Embedded in a single borderless campus, through transdisciplinary learning and teaching, cooperative research and innovation, and community outreach, EULiST seeks to make the knowledge square, i.e. education, research, innovation and society, a reality and advance open science principles using a new type of unified integrated digital library as its knowledge and communications hub.

### Structure

### Partners

The EULiST Members are:

- National Technical University of Athens, Greece (NTUA)
- University L'Aquila, Abruzzo, Italy (UNIVAQ)
- Slovak University of Technology in Bratislava, Slovakia (STU)
- Brno University of Technology, South Moravia, Czech Republic (BUT)
- Leibniz University Hannover, Lower Saxony, Germany (LUH)
- Jönköping University, Jönköping County, Sweden (JU)
- Lappeenranta-Lahti University of Technology, Finland (LUT)
- University Rey Juan Carlos, Community of Madrid, Spain (URJC)
- Technical University of Vienna, Austria (TUW)
- Institut Mines-Télécom, France (IMT)
